[Physics Unit Iv Worksheet 2 Answer Key Rar](#)

WORLD COMMUNICATES

What is this topic about?

To keep it as simple as possible, (K.I.S.S.) this topic involves the study of:

1. THE NATURE OF WAVES
2. THE PROPERTIES OF SOUND WAVES
3. ELECTROMAGNETIC WAVES
4. REFLECTION & REFRACTION
5. DIGITAL COMMUNICATION & ...in the context of c

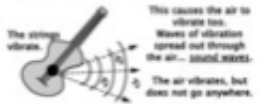

but first, let's revise...

ENERGY

Energy is what causes changes and does "work". The familiar forms of energy include:

- HEAT
- ELECTRICITY
- KINETIC (energy in a moving object)
- POTENTIAL (energy stored, such as the chemical energy in petrol).

Some forms of energy move around as WAVES. A wave is a **TRANSFER OF ENERGY**. In a wave, energy moves, but matter does not.

Waves Carry Energy Without the Transfer of Matter

TYPES of WAVES

Examples of energy which moves around as waves include

- SOUND
- LIGHT
- RADIO SIGNALS
- WATER WAVES
- X-RAYS
- MICROWAVES

... and many more

ENERGY CONVERSIONS

Energy can be converted from one form to another.

In your mobile phone the **SOUND WAVES** of your voice are converted to **ELECTRICAL** signals then transmitted as **RADIO WAVES** to your friend, whose phone converts it back again.

SOUND ↔ ELECTRICAL ↔ RADIO

In this topic you will learn about waves and their properties and features, and how they are used for communication.
